

## AFTER INFLUENZA— WINTER COLDS— BAD BLOOD

You are pale, thin, weak—with little vitality. Your liver is sluggish and the bad blood causes your stomach muscles to lose their elasticity and become flabby and weak—then indigestion.

Doctor Pierce's Golden Medical Discovery, made from wild roots and barks, and free from alcohol or narcotics, is the great and powerful blood purifier of to-day. Ingredients printed on wrapper. This tonic, in liquid or tablet form, is just what you need to give you vim, vigor and vitality.

Take it as directed and it will search out impure and poisonous matter throughout the system and eliminate it through the natural channels.

You can procure a trial package by sending 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

Reservoir, Mo.—"My father was once troubled with liver and kidney trouble. He not only suffered pain and distress but he became very nervous and all run-down."

and was always pale and heavy after meals. I know Dr. Pierce's medicine is very good and highly endorse their use."—Mrs. Minnie Davis.

**ENSILAGE SEED CORN**  
The best seed corn for silage. It grows early and matures early. It is the best for silage and for stock. It is the best for silage and for stock. It is the best for silage and for stock.

**PATENTS**

**SMOKING TOBACCO**  
FACTS FROM THE  
ENCYCLOPAEDIA

The Use of Flavorings Determines Difference in Brands

The Encyclopedia Britannica says about the manufacture of smoking tobacco: "In the Orient and in America, certain 'varieties' are employed. . . . the use of the 'varieties' is to improve the flavor and burning qualities of the leaves." Which directs that a single employment depends as much upon the flavoring used as upon the tobacco.

Your nose is a sure guide in the matter of flavoring. Try this simple test with several tobacco brands: pour some tobacco into your palm, rub lightly, and smell. You will notice a distinct difference in the fragrance of every brand. The tobacco that smells best to you will smoke best in your pipe; you can rest assured.

Carefully aged, old Burley tobacco, plus a dash of pure chocolate, gives FUXEDO Tobacco a pure fragrance your nose can quickly distinguish from any other tobacco. Try it and see.

## BARN IS FARMER'S BEST INVESTMENT

Modern Building Increases Production, Lessens Labor.

IDEAL STRUCTURE IS SHOWN

Plans Provide for Combination Dairy and Horse Stable—Brings All the Live Stock Under One Roof.

By WILLIAM A. RADFORD.

Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all subjects pertaining to the subject of building work on the farm, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 127 Prairie Avenue, Chicago, Ill., and only inclose three-cent stamp for reply.

"Better barns mean better and more productive cows." That is the axiom of the successful business farmer. Cows are valuable. More valuable than they have been in the history of the dairy industry in America. As profit producers they stand at the head of the live stock division of the farming industry.

When the owner of a dairy herd demonstrates to himself that a warm, well ventilated stable causes greater milk production at the time of the

year when milk brings the highest price, he wonders why he did not build such a barn before. And when with the modern barn equipment, he realizes that a great part of the improvement work about the barn can be performed easily and with less effort, he is not keen for modern conveniences in the barn as he is to have them in the house.

A comfortable cow is the best revenue producer. A cow that is cold, that is allowed to go thirsty until given times in the day does not produce the quantity of milk she is capable of giving. In a cold barn, that is poorly ventilated, a cow must consume greater quantities of food to keep herself warm. In a tight stable a greater portion of this food is converted into milk. Turning water in the barn, where the cow can take a drink whenever she wants one, also means greater milk production. "Put the water into the milk, only do it before instead of after milking" is the advice of the successful dairyman.

Good Buildings Reduce Waste.

During the last two years, the business farmer has been making money.

But he has realized that with the proper buildings he could have eliminated much of the waste around the farm, and have made more profit. Now he has a chance to get the buildings that have been denied him during war.

A combination dairy and horse barn, such as is shown in the accompanying illustration, is the ideal building, since it brings under one roof all the work of caring for the live stock. Constructed with a trussed rafter gambrel self-supporting roof, arranged conveniently so that the work can be performed with the least number of steps, and with all the latest improvements in ventilation, this building will prove a valuable addition to the farm. It will also serve as a place for the storage of hay and other feed stuffs, and as a place for the storage of manure and other waste products.

door, pass between the stalls, and go out at the other end of the building. At the rear of the cow barn are two food rooms, connected with the stalls. There also is a toilet room here.

The horse barn will accommodate ten animals, eight in stalls and two in box stalls. The farm office is at one side of the entrance and the harness room on the other.

While only the general scheme of equipment for this building is shown, the plans contemplate the use of many specialities that make for efficiency in doing the work required. The doors are equipped with storm-light, easy rolling lances. Drinking water is piped to individual drinking cups at each stall, providing clean, fresh water at all times of the day or night; food and litter carriers on overhead tracks make the distribution of food and the removal of manure easy. In the hay loft, a carrier is provided.

Careful provision has been made for ventilation, one of the most important features of the modern dairy and horse barn. There are air pumps or cupola ventilators on the roof, three large ones on the ridge of the main section of the barn and a fourth on the wing. These ventilators pull the foul air out of the stables through well insulated food air tubes. Fresh air comes in through the windows as they are tilted back at the top, resting on galvanized iron window ventilating shields. With these the fresh air is deflected to the stable ceiling, where it diffuses gradually; no direct draft blows against the animals. Sunlight is nature's greatest germ killer. Plenty of windows are provided in this barn.

Taken all together, the plan shown gives all the practical features that a modern barn should have to make the

animals comfortable and productive. There is another side to the question of whether or not a strictly modern barn building with all the best equipment is a good investment. That is a human side.

Much Labor Eliminated.  
Farming is the country's greatest business. But in the past there have been many disadvantages that have driven the young men from the farm. The work under the old conditions was not pleasant, especially that in the barn. But when there is a complete floor, with gutters into which the dirt can be washed; when there are carriers that take the food to the managers and the manure out; and water at each stall, so that none has to be carried; or the animals driven to an outdoor water trough, which in the winter was usually frozen, there is none of the arduous labor taking care of the livestock that there was in the past.

A modern dairy and horse barn is one of the best paying investments the farmer can make. It will bring large returns in both money and satisfaction. It will lighten the work of care-

that best portion of a good man's life. His little household unnumbered acts of kindness and of love. —Wordsworth.

**SIMPLE INEXPENSIVE DISHES.**  
The chief business of the house mother is to see that her family is well nourished and happy.

A most tasty salad may often be prepared with but a few small bits of fruit. Cut up one banana, add a diced apple, a handful of raisins, and a few sections of orange or grape fruit and serve with.

Huntington Dressing.—Beat two eggs very light and add gradually, beating constantly, three tablespoonfuls of melted butter, three tablespoonfuls of lemon juice and one-half teaspoonful of salt. Cook over hot water, stirring constantly until the mixture thickens. Cool, add one cup of heavy cream beaten stiff, one-fourth of a cup of powdered sugar, one-half teaspoonful of vanilla, and one-half teaspoonful of vanilla. Beat for five minutes.

Cream Cheese With Jelly.—Cream cheese may be used for this, but cottage cheese is even better. Season cottage cheese with cream, make into small balls, flatten in the center and fill with bright red jelly. Serve as a salad with crackers or as a dessert with coffee.

Carrot Salad.—Separate French endive, wash and drain, then cut. Cut endive heads in quarters, lay slices and slice in rings or fancy shapes. Arrange on a large platter, leaving space in the center for the dressing. Dress with French dressing to which has been added three tablespoonfuls of chopped hard-boiled eggs.

Oats Bread.—Add two cups of boiling water to one cup of rolled oats and beat until smooth; add one-half cup of molasses, one-half cup of shortening, one-half cup of sugar, one-half cup of vanilla, and one-half cup of vanilla. Beat for five minutes.

Indian Habits Changed.  
The commonest of red war paint and bold fronted warriors have been found in the West in the early days of the war.

Johnnie was walking down an aisle of a department store with his mother. Suddenly she noticed him remove his hat for a few minutes. When he had put it back on, she asked:

"Why, Johnnie, why did you do that?"

Johnnie eyed her with scorn and then pointed to the decorations:

"We passed under the flag, mother," Indianapolis News.

A Boy's Friend.
